

Computing

As part of the The Hive curriculum we talk about ensuring safety online. E-Safety is incredibly important, especially at times like these. Encourage your child to choose secure passwords and to not share personal information online.

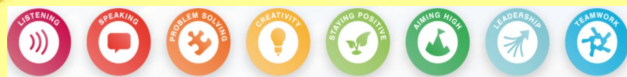

Maths

We have been learning about addition, subtraction and multiplication this half term, building our knowledge. Please help children with their Times tables.

COJO

Ask your children about what they are learning in COJO and which of the Gosport Future qualities they are focussing on at the moment?

How parents can help their child in The Hive

Here are some ideas to help you support and
reinforce your child's learning at home.

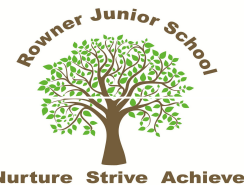

English

We have been reading 'Kaspar' by Michael Morpurgo this half term, which links to our Titanic Project. We have also been looking at adjectives and conjunctions in other books to help with our writing, which has been our focus this half term.

To support, reading a wide range of books at home will help your child to develop a good vocabulary on this topic.

Art

Encourage your child to try using different mediums for art, such as drawing, painting, sketching and collage. In The Hive we are trying to create our school emblem of trees using a variety of different mediums and techniques.

STEM

We have been learning about density in our STEM lessons and trying out some exciting experiments. Please encourage children to take part if possible.
